***Election/Restrictions***

1. Applicant's election of claims 11-17 and 19-25 in the reply filed on January 28, 2005 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

***Claim Rejections - 35 USC § 112***

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 11-17 and 19-25 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 11 recites the phrases "an additional mounting part", "an additional elastic element" and "an additional movable safety element) in claim 1 are inappropriate since there is no antecedent bases necessitating the use of the term "additional".

Claim 23 recites the limitation "corresponding chambers" in line 4. There is insufficient antecedent basis for this limitation in the claim. Examiner is unsure as to what structure defines a chamber.

Claim 24 recites the limitation "unloaded" in line 5. It is unclear as to how the term "unloaded" structurally defines the safety element.

Claim 25 recites the phrase "safety element which is redundant and functionless" in lined 5-6 which renders the claim indefinite because it is unclear whether the limitation(s) following the phrase are part of the claimed invention. See MPEP § 2173.05(d).

***Claim Rejections - 35 USC § 102***

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 11-13, 15, 17, 19, 20, 22, 24 and 25 are rejected under 35 U.S.C. 102(b) as being anticipated by Kato (USPN 4,086,970).

Regarding claims 11-13, 15, 17, 19, 20, 22, 24 and 25, Kato discloses a hand power tool (column 1 lines 6-10), comprising a housing (1); at least one handle having at least one gripping part (14); a mounting part (11) having two sleeves (area surrounding elastic element extensions into mounting part) and a disc (12); at least one elastic, vibration damping element (8) mounted on the mounting part (11), the at least one gripping part (14) being mounted on the housing (1) through the elastic element (8) and through the mounting part (11); at least one movable and non-rigid safety element (7) through which the gripping part (14) is connected with the mounting part (11), the safety element (7) being movable during a predetermined operation relative to the gripping part (13) to avoid a passage of vibration through the safety element (7), wherein the elastic element (8) surrounds the safety element (7). The safety element (7) of Kato is specifically disclosed as being a cable <sup>1</sup>, also defined as a rope <sup>2</sup>, for protecting terminals of the power source.

6. Claims 11, 14-17, 19 and 21 are rejected under 35 U.S.C. 102(b) as being anticipated by Wilhelm (USPN 1,358,486).

In reference to claims 11, 14-17, 19 and 21, Wilhelm discloses a hand power tool, comprising a housing (A); at least one handle having at least one gripping part (L) and a mounting part (F), at least one elastic, vibration damping element (R) mounted on the mounting part (F), the gripping part (L) being mounted on the housing (A) through the elastic, vibration damping element (R) and the mounting part (F); and at least one movable, rigid safety element (G) through which the gripping part (L) is connected with the mounting part (F), the safety element (G) being movable relative to the gripping part (L), wherein the safety element (G) is within the elastic element (R) and in the form of a rigid rod.

***Allowable Subject Matter***

7. Claim 23 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter: The art of record considered as a whole, alone or in combination, neither anticipates nor renders obvious a hand power tool comprising a handle attached to a housing through a mounting part and an elastic element wherein two sleeves are mounted on the mounting part, the two sleeves being provided with first and second sleeve discs, and safety element in the form of a rod having two ends, the two ends being provided with first and second rod discs.
